Forwards Copy of a letter from the Supdt Bangalore Central Jail, bringing to notice that the required number of weights and measures would not be available for distribution before the 1st Oct 1912 and so requests that the rules may be brought into force from 1st Feb 1913

13 The file regarding the manufacture of weights and measures has been sent to the Chief Engineer unofficially

19 From the statement furnished by the DC it will be seen that 7,200 cast iron weights and 5,600 galvanised iron measures out of 10,000 sets are due to be supplied before the 1st Oct 1912 — the date on which the rules will come to force.

15 On account of the shortness of the supply of weights and measures the DC requests that the rules be brought into force from 1st Jan 1913

NOTIFICATION.

No. J. 3591—*Legis.* 16-09, *dated 5th June* 1912.

The Government of His Highness the Maharaja of Mysore are pleased to direct that the Rules under the Mysore Weights and Measures Regulation, No. III of 1902, issued under Notification No. J. 864—Legis. 16-09-37, dated the 11th September 1911, shall come into force throughout the State on the 1st day of October 1912 instead of on the 1st July 1912, as stated in the preamble to the said Notification.

By Order,

K. R. SRINIVASIENGAR,

Officiating Secretary to Government,
General and Revenue Departments.

5

Letter No.104/M dated the 11th September 1912 from T.Chokkannah Esqr., Offg. Superintendent, Central Jail, Bangalore, to P.S.Achyuta Rao Esqr., Inspector-General of Prisons in Mysore. Bangalore.

-:ooooooooooooo:-

I have the honor to report that up till this day 1300 sets of weights and 324 of Measures newly manufactured in the Water Works and Stores Division under orders of Government have been received for distribution throughout the Province.

Under existing orders the time for the commencement of working the new Regulation has been fixed at 1st October 1912.

As all the 10,000 sets originally thought sufficient to meet present requirements may not be ready for distribution before that date, I would suggest a recommendation be sent to Government extending the period to the 1st January 1913. The enclosed list received from the Executive Engineer, Water Supply and Stores Division, shows clearly that even there it is not expected that the full compliments of weights and measures will be ready before 1st October 1912.

It will be unfair to work the new rules before trades people can be expected to supply themselves with the new implements of weight and measure and use them in their dealings with the public.

K.R.Srinivasiengar, Esq., M.A.,
Offg. Secretary to the Government of
His Highness the Maharaja of Mysore,
General and Revenue Departments.

Sir,

WEIGHTS AND MEASURES.

With reference to Government Notification No.J.3591/Legis. 16-09 dated the 5th June 1909 directing that the rules under the Weights and Measures Regulation be brought into force from the 1st October 1912, I have the honour to state that the Superintending Engineer, Southern Circle, reports that, on account of unavoidable delay in placing orders with the firms, the 10,000 sets of weights and measures required will not be ready before the end of November next. He therefore suggests a further postponement of the date to the first day of January 1913.

2. The supply expected up to end of current month is as noted in the margin and, if this quantity will suffice for immediate requirements, there will be no need of further postponement. But, if the demand is likely to exceed the expected supply, the postponement cannot be avoided.

	Iron	Brass
Measures	3,096	12
Weights	2,000	500

Letter No.7004 dated the 18th September 1912 from the Superintending Engineer, Southern Circle, to the Chief Engineer of Mysore, Bangalore.

With reference to your No.7518 of the 7th instant, enquiring whether the required number of weights and measures will be ready for issue by the 1st October next, I have the honour to submit herewith a statement shewing the number of weights and measures - expected to be got by the end of current month. From which it will be seen that 1208 sets of measures and 1589 sets of weights have already been received. The Executive Engineer reports that the whol quantity will be received by the end of November next. As some time was lost in calling for tenders and obtaining necessary agreements from the different contractors, full quantity required cannot be got before the 1st October as expected. The contractors are being urged to keep to their promises.

2. To be on the safe side it would be advisable to further postpone the operation of the rules, say till the end of the current year.

3. The sample weights and measures called for in your No.7094 of the 24th ultimo, are herewith forwarded.

Kal V. Ramaswamy Iyer,
Sup. Southern circle

Letter No.216 dated the 23rd September 1912 from th Superintending Engineer, Southern Circle, to the Chief Engine of Mysore, Bangalore.

As already explained I regret to say that some time was lost in obtaining orders to let out the work of manufacturing the weights and measures on contract in calling for tenders and in obtaining necessary agreements from some of the contractors of Madras and Nellore; full quantity cannot therefore be had by the end of the month as expected.

2. The contractors pleaded their inability to deliver the tendered quantities in full within the short period they had before them and wanted time to deliver the same in three instalments as noted in the margin. As their request was only reasonable, the same was granted.

3. As per terms of the contract bonds executed by the several contractors, full quantity of the supply is only due to us by the end of November 1912. The contractors are being urged constantly and all possible endeavour is being made to get the full quantity by instalments.

Under these circumstances, the delay is unavoidable.
